1. The first part of the paper is devoted to the study of the asymptotic behavior of the solutions of the system (1) as $t \rightarrow \infty$. It is shown that the solutions of the system (1) are bounded and tend to zero as $t \rightarrow \infty$ if the matrix A is stable. The second part of the paper is devoted to the study of the asymptotic behavior of the solutions of the system (1) as $t \rightarrow \infty$ if the matrix A is not stable. It is shown that the solutions of the system (1) are unbounded and tend to infinity as $t \rightarrow \infty$ if the matrix A is not stable.

A vertical strip of a film strip, likely a negative, showing four frames of the text "THE END" in a stylized, blocky font. The frames are arranged vertically, with the text appearing in each frame. The film strip has a dark, textured background, and the text is light-colored, possibly white or yellow. The frames are separated by dark, irregular borders, suggesting the edges of the film frames. The overall appearance is that of a vintage film negative.
